CANCER
LETTERS

Subject index
Volume 76 (1994)

Aberrant crypt, colon, bile acid, cell proliferation, preneoplastic lesions, 101
Aberrant crypts foci, aspirin, 1,2-dimethylhydrazine, rat colon, 5 N^1-acetylspermidine, glioma, polyamines, spermidine/spermine N^1-acetyltransferase, spermidine N^8-acetyltransferase, 121
Aflatoxin B_1 (AFBa), aflatoxin B_1-DNA binding, aflatoxin B_1-epoxide, buthionine sulfoximine, GSH, 25
Aflatoxin B_1-DNA binding, aflatoxin B_1 (AFBa), aflatoxin B_1-epoxide, buthionine sulfoximine, GSH, 25
Aflatoxin B_1-epoxide, aflatoxin B_1 (AFBa), aflatoxin B_1-DNA binding, buthionine sulfoximine, GSH, 25
Age and sex differences, NON/Shi mouse, renal pelvic carcinogenesis, metastasis, *N*-butyl-*N*-(4-hydroxybutyl) nitrosamine, 147
Aldehyde dehydrogenase, human tumor cell lines, cyclophosphamide, 45 Alveologenic carcinoma, lung epithelial cells, oncogenes, type-2 pneumocytes, 87
Angiotensin II, bradykinin, endothelin-1, non-small cell lung cancer (A549), cytosolic free calcium, fura-2 fluorescence, losartan (DuP 753), AT_1 receptors, 19
α_1-Antichymotrypsin, breast cyst fluid, electrolytes, gross cystic breast disease, protease inhibitors, 155
Aspirin, 1,2-dimethylhydrazine, aberrant crypts foci, rat colon, 5 Asymmetric PCR, direct sequencing, mutation, polymorphism, 93 AT_1 receptors, angiotensin II, bradykinin, endothelin-1, non-small cell lung cancer (A549), cytosolic free calcium, fura-2 fluorescence, losartan (DuP 753), 19
Azoxymethane, monoamine oxidase, colon cancer, rat, catecholamine, 177

Bile acid, aberrant crypt, colon, cell proliferation, preneoplastic lesions, 101
Birth order, HTLV-I, last-born women, husband-to-wife, 191
Bradykinin, angiotensin II, endothelin-1, non-small cell lung cancer (A549), cytosolic free calcium, fura-2 fluorescence, losartan (DuP 753), AT_1 receptors, 19
Breast cancer, linoleic acid, collagenase, 71
Breast cyst fluid, α_1 antichymotrypsin, electrolytes, gross cystic breast disease, protease inhibitors, 155
Buthionine sulfoximine, aflatoxin B_1 (AFB_1), aflatoxin B_1-DNA binding, aflatoxin B_1-epoxide, GSH, 25
N-butyl-*N*-(4-hydroxybutyl) nitrosamine, NON/Shi mouse, renal pelvi carcinogenesis, metastasis, age and sex differences, 147
Butyrate, colorectal cancer, tumor differentiation, PAI-1, 167

Carcinogensis, mammary tumors, chloroquine, quinacrine, prostaglandins, glutathione, riboflavin, 113
Catecholamine, monoamine oxidase, colon cancer, rat, azoxymethane, 177
CD44, human prostate cancer, 63 Cell proliferation, aberrant crypt, colon, bile acid, preneoplastic lesions, 101
Chemoprevention, gomisin A, 3'-methyl-4-dimethylaminoazobenzene, glutathione-*S*-transferase placental form, ploidy analysis, liver, 11
Chloroquine, mammary tumors, carcinogensis, quinacrine, prostaglandins, glutathione, riboflavin, 113
Cholesterol, mammary cancer, monoterpene, ubiquinone, 185
Chronic lymphocytic leukemia, monoclonal antibody, iodine-131, nude mice, pharmacokinetics, radioimmunoimaging, 31
Collagenase, breast cancer, linoleic acid, 71
Colon, aberrant crypt, bile acid, cell proliferation, preneoplastic lesions, 101
Colon cancer, monoamine oxidase, rat, azoxymethane, catecholamine, 177
Colorectal cancer, tumor differentiation, butyrate, PAI-1, 167
Cyclophosphamide, aldehyde dehydrogenase, human tumor cell lines, 45
Cytosolic free calcium, angiotensin II, bradykinin, endothelin-1, non-small cell lung cancer (A549), fura-2 fluorescence, losartan (DuP 753), AT_1 receptors, 19
Cytostasis, leukemias, estrogens, progestins, cytotoxicity, 81
Cytotoxicity, leukemias, estrogens, progestins, cytostasis, 81

Dietary iron, oxidative stress, DNA single strand breaks, lung tumorigenesis, mice, 57
1,2-Dimethylhydrazine, aspirin, aberrant crypts foci, rat colon, 5
Direct sequencing, asymmetric PCR, mutation, polymorphism, 93
DNA breaks, single cell gel assay, laser scanning microscopy, 127
DNA single strand breaks, dietary iron, oxidative stress, lung tumorigenesis, mice, 57
Drug transport, multidrug resistance, P-glycoprotein, protein kinase C, 139

Electrolytes, α_1 antichymotrypsin, breast cyst fluid, gross cystic breast disease, protease inhibitors, 155

SSDI 0304-3835(94)03298-W

Endothelin-1, angiotensin II, bradykinin, non-small cell lung cancer (A549), cytosolic free calcium, fura-2 fluorescence, losartan (DuP 753), AT_1 receptors, 19
Estrogens, leukemias, progestins, cytostasis, cytotoxicity, 81

F344 rat, R7000, hepatocarcinogenesis, GST-P positive foci, rapid bioassay, 161
Fenretinide, topical application, pre-cancerous lesions, 109
Fura-2 fluorescence, angiotensin II, bradykinin, endothelin-1, non-small cell lung cancer (A549), cytosolic free calcium, losartan (DuP 753), AT_1 receptors, 19

Glioma, N^1-acetylspermidine, polyamines, spermidine/spermine N^1-acetyltransferase, spermidine N^8-acetyltransferase, 121
Glutathione-*S*-transferase placental form, gomisin A, 3'-methyl-4-dimethylaminoazobenzene, ploidy analysis, chemoprevention, liver, 11 Glutathione, mammary tumors, carcinogensis, chloroquine, quinacrine, prostaglandins, riboflavin, 113
Gomisin A, 3'-methyl-4-dimethylaminoazobenzene, glutathione-*S*-transferase placental form, ploidy analysis, chemoprevention, liver, 11 Gross cystic breast disease, α_1-antichymotrypsin, breast cyst fluid, electrolytes, protease inhibitors, 155
Growth, Krebs II ascites cells, lectins, phytohaemagglutinin, protein synthesis, ribosomes, 133 GSH, aflatoxin B_1 (AFB_1), aflatoxin B_1-DNA binding, aflatoxin B_1-epoxide, buthionine sulfoximine, 25
GST-P positive foci, R7000, hepatocarcinogenesis, rapid bioassay, F344 rat, 161

Hepatocarcinogeneis, R7000, GST-P positive foci, rapid bioassay, F344 rat, 161
HTLV-I, birth order, last-born women, husband-to-wife, 191
Human prostate cancer, CD44, 63
Human tumor cell lines, aldehyde dehydrogenase, cyclophosphamide, 45
Husband-to-wife, HTLV-I, birth order, last-born women, 191

Induction of P-glycoprotein, multidrug resistance, 51
Interleukin-6, protein, skeletal muscle, tyrosine, 1 Iodine-131, chronic lymphocytic leukemia, monoclonal antibody, nude mice, pharmacokinetics, radioimmunoimaging, 31

Krebs II ascites cells, lectins, phytohaemagglutinin, growth, protein synthesis, ribosomes, 133

Laser scanning microscopy, single cell gel assay, DNA breaks, 127
Last-born women, HTLV-I, birth order, husband-to-wife, 191
Lectins, Krebs II ascites cells, phytohaemagglutinin, growth, protein synthesis, ribosomes, 133
Leukemias, estrogens, progestins, cytostasis, cytotoxicity, 81
Linoleic acid, breast cancer, collagenase, 71
Liver, gomisin A, 3'-methyl-4-dimethylaminoazobenzene, glutathione-*S*-transferase placental form, ploidy analysis, chemoprevention, 11
Losartan (DuP 753), angiotensin II, bradykinin, endothelin-1, non-small cell lung cancer (A549), cytosolic free calcium, fura-2 fluorescence, AT_1 receptors, 19
Lung epithelial cells, alveologenic carcinoma, oncogenes, type-2 pneumocytes, 87
Lung tumorigenesis, dietary iron, oxidative stress, DNA single strand breaks, mice, 57

Mammary cancer, monoterpene, cholesterol, ubiquinone, 185
Mammary tumors, carcinogensis, chloroquine, quinacrine, prostaglandins, glutathione, riboflavin, 113
Metastasis, NON/Shi mouse, renal pelvic carcinogenesis, *N*-butyl-*N*-(4-hydroxybutyl) nitrosamine, age and sex differences, 147
3'-Methyl-4-dimethylaminoazobenzene, gomisin A, glutathione-*S*-transferase placental form, ploidy analysis, chemoprevention, liver, 11
Mice, dietary iron, oxidative stress, DNA single strand breaks, lung tumorigenesis, 57 Monoamine oxidase, colon cancer, rat, azoxymethane, catecholamine, 177
Monoclonal antibody, chronic lymphocytic leukemia, iodine-131, nude mice, pharmacokinetics, radioimmunoimaging, 31
Monoterpene, mammary cancer, cholesterol, ubiquinone, 185
Multidrug resistance, induction of P-glycoprotein, 51
Multidrug resistance, P-glycoprotein, protein kinase C, drug transport, 139
Mutation, asymmetric PCR, direct sequencing, polymorphism, 93

Non-small cell lung cancer (A549), angiotensin II, bradykinin, endothelin-1, cytosolic free calcium, fura-2 fluorescence, losartan (DuP 753), AT_1 receptors, 19
NON/Shi mouse, renal pelvic carcinogenesis, metastasis, *N*-butyl-*N*-(4-hydroxybutyl) nitrosamine, age and sex differences, 147
Nude mice, chronic lymphocytic leukemia, monoclonal antibody, iodine-131, pharmacokinetics, radioimmunoimaging, 31

Oncogenes, alveologenic carcinoma, lung epithelial cells, type-2 pneumocytes, 87
Oxidative stress, dietary iron, DNA single strand breaks, lung tumorigenesis, mice, 57

P-glycoprotein, multidrug resistance, protein kinase C, drug transport, 139
PAI-1, colorectal cancer, tumor differentiation, butyrate, 167
Pharmacokinetics, chronic lymphocytic leukemia, monoclonal antibody, iodine-131, nude mice, radioimmunoimaging, 31
Phytohaemagglutinin, Krebs II ascites cells, lectins, growth, protein synthesis, ribosomes, 133
Ploidy analysis, gomisin A, 3'-methyl-4-dimethylaminoazobenzene, glutathione-*S*-transferase placental form, chemoprevention, liver, 11 Polyamines, glioma, N^1-acetylspermidine, spermidine/spermine N^1-acetyltransferase, spermidine N^8-acetyltransferase, 121

Polymorphism, asymmetric PCR, direct sequencing, mutation, 93
Pre-cancerous lesions, fenretinide, topical application, 109 Preneoplastic lesions, aberrant crypt, colon, bile acid, cell proliferation, 101
Progestins, leukemias, estrogens, cytostasis, cytotoxicity, 81
Prostaglandins, mammary tumors, carcinogensis, chloroquine, quinacrine, glutathione, riboflavin, 113
Protease inhibitors, α_1 antichymotrypsin, breast cyst fluid, electrolytes, gross cystic breast disease, 155
Protein, interleukin-6, skeletal muscle, tyrosine, 1
Protein kinase C, multidrug resistance, P-glycoprotein, drug transport, 139
Protein synthesis, Krebs II ascites cells, lectins, phytohaemagglutinin, growth, ribosomes, 133

Quinacrine, mammary tumors, carcinogensis, chloroquine, prostaglandins, glutathione, riboflavin, 113

R7000, hepatocarcinogenesis, GST-P positive foci, rapid bioassay, F344 rat, 161
Radioimmunoimaging, chronic lymphocytic leukemia, monoclonal antibody, iodine-131, nude mice, pharmacokinetics, 31
Rapid bioassay, R7000, hepatocarcinogenesis, GST-P positive foci, F344 rat, 161
Rat, monoamine oxidase, colon cancer, azoxymethane, catecholamine, 177
Rat colon, aspirin, 1,2-dimethylhydrazine, aberrant crypts foci, 5
Renal pelvic carcinogenesis, NON/Shi mouse, metastasis, *N*-butyl-*N*-(4-hydroxybutyl) nitrosamine, age and sex differences, 147 Riboflavin, mammary tumors, carcinogensis, chloroquine, quinacrine, prostaglandins, glutathione, 113
Ribosomes, Krebs II ascites cells, lectins, phytohaemagglutinin, growth, protein synthesis, 133

Single cell gel assay, DNA breaks, laser scanning microscopy, 127
Skeletal muscle, interleukin-6, protein, tyrosine, 1 Spermidine/spermine N^1-acetyltransferase, glioma, N^1-acetylspermidine, polyamines, spermidine N^8-acetyltransferase, 121
Spermidine N^8-acetyltransferase, glioma, N^1-acetylspermidine, polyamines, spermidine/spermine N^1-acetyltransferase, 121

Topical application, fenretinide, pre-cancerous lesions, 109
Tumor differentiation, colorectal cancer, butyrate, PAI-1, 167
Type-2 pneumocytes, alveologenic carcinoma, lung epithelial cells, oncogenes, 87
Tyrosine, interleukin-6, protein, skeletal muscle, 1

Ubiquinone, mammary cancer, monoterpene, cholesterol, 185
